Behaviour Support Plan

This plan is meant as a way for you to communicate with our camp staff the best ways to support your camper at camp. We find that there are often specific words or techniques that are used at home or in school that really work for individual campers, and we would like to try and use that knowledge. Some campers may need extra support in setting personal space boundaries, aggression, bullying, homesickness or non-compliance.

Obviously the camp environment is very different from both home and school and techniques that might work elsewhere might not work at camp. We will do our best to implement the plan you send. We find that the more involved the camper is in the plan the more successful it is.

If you feel that the questions provided on this form do not address the needs of your camper, please feel free to attach additional documentation. The more information you can provide us, the better able to support your camper we will be!

Name of Camper: _____

Please describe behaviours that we might see from your camper at camp:

What are some triggers?

What are some techniques our staff should use to effectively help your camper in these situations? Are there any keywords or actions that you use?

What are some ideas to help prevent behaviours from happening?

Please include any other information that might be helpful to our staff in providing the appropriate support to your camper:

Completed By: _____(name) Relationship to Camper: _____
